

Year 10 – Summer Bridging Project - Product Design – Explanation Sheet

Attached are some core theory revision mats. You have been going through this work during lock down. Recreate these revision sheets in a way that works best for you. You could create revision cards, a spider diagram of the information or your own revision mat. The process of writing out information has a proven link to being able to remember so do it by hand not on the computer.

Bring your work into school on the first week back. We will have a test on the information to ensure you have learnt it correctly.
