

If you are having problems downloading the application form on the school website or from Teach in Herts, please follow the instructions below:

If you get a message along the lines of “this pdf can’t be viewed directly in the browser” this is because some browsers can’t display the pdf.

To open it you can click into the document on the school website and right-click to ‘Save as...’ or right-click on the “Application Form” link in the documents list on the job advert on the Teach in Herts website and “Save as...”.

Then open it from wherever you have saved it on your computer.

It should then open up in Adobe Reader, as long as you have it installed. If not it can be downloaded from: <https://get.adobe.com/uk/reader/>
